Dear Karen

At times like these – when we are all thinking about our health and the health of our loved ones – we at Oakville Hospital Foundation are especially grateful for our community of donors. Thank you so much for the recent donation of personal protective equipment for our frontline workers from FLL.

We are deeply grateful for this donation given to support the community during this unprecedented time. Now more than ever community support ensures our neighbours can continue to access quality healthcare close to home – keeping families together and removing the additional stress of travel in times of medical crisis.

Thanks to your generosity, and the support of other like-minded donors, we continue to provide world-class community healthcare right here in Oakville. If you have any questions or would like additional information about the foundation or hospital, please do not hesitate to contact us at 905-338-4642.

Sending my best wishes to you and those closest to you.

Yours in gratitude,
